

DANLEY'S DTS10 "DO IT YOURSELF" SUBWOOFER KIT

BRINGS NEW FOUND FUN AND PERFORMANCE TO HOME THEATER ENTHUSIASTS

PRESS RELEASE

GAINESVILLE, GEORGIA –

JANUARY 2010:

If you are one of many who post on various audio forums, you may know about the Danley Sound Labs, DIY subwoofer offer. For several months, legendary loudspeaker manufacturer, Danley Sound Labs, has been offering its DTS10 subwoofer as a DIY kit (no kidding).

This is a LIMITED TIME OFFER. Keep those last three words in mind as orders keep coming in at amazing rate and the company may have to select an end date. So, act now. For a fraction of the price of a regular Danley home theater sub, the DIY DTS10 45" x 60" x 16" delivers bass down to 11 Hz at chest-crushing SPLs with the robust fidelity for which Danley is renowned. And with the owner's very hands responsible for its assembly, pride of ownership coupled with performance will soar to the ceiling as friends' jaws drop to the floor. Again, this is a limited time offer. Interested parties should contact Danley Sound Labs directly to place an order.

The kit ships with all of the wood pre-cut and pre-drilled and includes two custom 12-inch drivers as well. Due to flexibility in output porting, the DTS10 can be positioned in almost any orientation with no reduction in frequency response or SPL.

"The DTS10 boasts conservative specs that will make any home theater enthusiast drool. We have customers replacing multiple 18-inch extremely long travel drivers with a DTS10," said Mike Hedden, president of Danley Sound Labs. "Outdoors at one meter, one watt of input generates 90 dB at 12 Hz; 99 dB at 20 Hz; and 108 dB at 80 Hz. There simply isn't another sub – even ones costing many times more money – that competes." Moreover, the price cannot be beat, and since most audiophiles will find building their own sub a labor of love, the assembly time is just value added."

To order your very own Danley DIY DTS10, call or e-mail Jeff Pulliam, customer service, Danley Sound Labs, (770) 535-0204, (770) 535-8485 fax, jpulliam@danleysoundlabs.com
