

# SBH Wall Bracket - BRKT-W

Thank you for purchasing the SBH wall bracket. The kit should include the following:

4 x M10 - 1.5 x 45 mm

4 x washer

4 x locking washer

1 x SBH-Bracket

Below is an illustration of how the bracket attaches to your Danley Sound Labs loudspeaker. The purpose of the kit is to add an adjustable tilt mounting bracket to your loudspeaker.

1. Secure the bracket to mounting surface with eight bolts. (Not included)
2. Place two bolts, washers and lock washers into the attachment points on the speaker cabinet where the fixed part of it will be attached to the bracket. The bolts should be left with plenty of thread remaining outside of the speaker cabinet.
3. Slide bolts into slot and down the slot toward the ground with the washers remaining on the outside of the bracket.
4. Pivot the cabinet back and set the angle by aligning the center side attachment point with the desired slot.
5. Install bolt, washer and lock washer.
6. Tighten all bolts.

If using the arm extenders for angles greater than 7.5° attach one end of the arm extender to the center attachment point on the speaker cabinet and the other end to the desired angle holes 10° - 20°
