

Danley Sound Labs - DNA Amplifier Preset Library Update

Release Version: 241105

Release Date: November 18th, 2024

New Features and Updates

We are excited to announce the latest version of the preset library for the Danley DNA amplifier line. This comprehensive update includes all presets available to date and introduces several significant enhancements aimed at improving user experience and functionality.

Updates:

- **FLX12**
- **OS80 v1.0 w/ FIR**
- **OS62 v1.0**
- **Nano v1.0**

Major Changes:

1. **Simplified Numbering System:**
 - We have transitioned from coded names to a simplified numbering system for all products. This new system allows users to easily load presets using an included reference chart without the need for a PC.
2. **PC User Enhancements:**
 - For PC users, the full library of presets is now available as individual DSE files, providing more flexibility and ease of access.

This update reflects our commitment to continuous improvement and user satisfaction. We believe these enhancements will make it easier for our users to access and apply the correct presets, thereby optimizing the performance of their audio systems.

How to Update:

1. Download the latest preset library from the Danley Sound Labs website.
2. Follow the instructions included in the download package to install the new presets on your DNA amplifiers.

Thank you for your continued support. For any questions or further assistance, please contact jason@danleysoundlabs.com.
